PROFESSIONAL SUMMARY

BSc Computer Science graduate (COMSATS University Islamabad, CGPA 3.23, March 2026) with 1.5+ years of professional experience building production-grade cross-platform mobile and full-stack applications. Specializes in Flutter/Dart with deep expertise in clean architecture (MVVM + BLoC/GetX), Firebase, and REST APIs. Experienced in full-stack development with Node.js, Express.js, and MongoDB. Delivered three complete production-level projects — a ride-sharing app, an AI-powered learning platform, and a full-featured e-commerce system — each with real-time data, payment integration, role-based access, and offline-first architecture. Known for analytical depth, long-term architectural thinking, and continuous self-driven learning across mobile engineering, AI/ML, and DevOps.

WORK EXPERIENCE

Full Stack Flutter Developer

Jan 2025 – Feb 2026

CRIFLY · Part-Time / Remote · 1 Year

Built and maintained cross-platform Flutter applications with Firebase and REST API integrations. Delivered production features including real-time data sync, clean architecture patterns, and scalable backend systems. Reference: Waqar Hassan (CEO) — waqar@crifly.com

Full Stack Flutter Developer

Jun 2024 – Sep 2024

CRIFLY · Internship · 3 Months

Demonstrated strong technical aptitude and professional conduct. Contributed to mobile development tasks using Flutter and Firebase under direct mentorship.

PORTFOLIO PROJECTS

BrainBee — AI-Powered Learning App

Flutter · Node.js · Express.js · MongoDB · RAG/AI

AI-generated flashcards, quizzes, summaries & RAG-based chatbot. Adaptive personalized study plans, peer battles, leaderboards, badges, and gamification system. Scalable clean architecture with multi-role support (student/teacher/parent).

Ride Sharing App

Flutter · Firebase · Google Maps API · Flutter TTS

Full-stack app with three roles (rider, driver, admin). Real-time GPS tracking, polyline route visualization, turn-by-turn voice navigation. Smart radius-based ride matching, off-route rerouting, in-app
